## Button Up Necklace

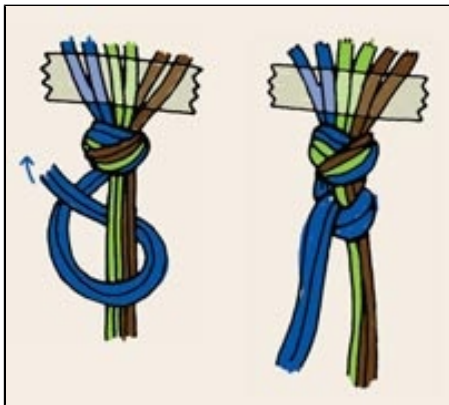

From *Cool Stuff: Knot This!* (#4669)

You need a bunch of buttons...try 9. Cut 4 pieces of each floss color 9 feet long. (We used 4 different greens.)

Note that basic knot instructions and tips follow the project instructions.

Fold the pieces in half & knot a loop near the folded end that'll go over a button.

Tie 10 left knots with each color & repeat. Tie a knot & thread buttons onto the floss. Tie the left knots again & knot a button on the end. Snappy.

### Spiral (Using Left Knots)

For a spiral, cut your floss, tie an overhand knot, & tape down 1 end. Take 1 color (may be more than 1 strand) & make left knots around the others. Change the tying color whenever...

### For Starters & Enders (or wherever it just says, "tie a knot")

To knot one end, cut your strands & hold 'em together. Leave a 4" tail & tie an overhand knot near one end.

For an end loop, double your strands and tie an overhand knot near the folded end.

### For In Between

To thread buttons or small beads on floss, use a needle threader. Works great!
